ABSTRACT

The information technology industry has become one of the most robust industries in the world of IT, more than any other industry or economic facet, has an increased productivity, particularly in the developed world, and therefore is a key driver of global economic growth. Economies of scale and insatiable demand from both consumers and enterprises characterizes this rapidly growing sector.

Information technology is a growing field that offers relatively secure positions for those with solid technical skills and at least a bachelor's degree in an IT-related field. From support to engineering, there are several specializations that deal with the various facets of information technology. An organized and systematic office solution is essential for all the organizations.

With the growth of the information technology we see the growth of various companies. It becomes difficult to keep a track of all the companies and their records. This project aims at simplifying your work. It lists all the top companies, their track records, helps you see their branches, and gives you information about their managers and employees. This project also aims at helping you select the best company by providing all the details. Users can compare and select the one that suits them better.

ACKNOWLEDGMENT

The fulfillment and rapture that go with the fruitful finishing of any assignment would be inadequate without the specifying the people who made it conceivable, whose steady direction and support delegated the endeavors with success.
